EXPERIENCE

Data Analyst, Greenfield Grocers

Jun 2023 – Present

Minneapolis, MN (Remote)

- Built demand forecasting models in Python (scikit-learn, XGBoost) that cut produce waste 8% across 300 stores.
- Maintain 40+ dbt models and Snowflake pipelines feeding Tableau dashboards for merchandising leaders.
- Designed and analyzed A/B tests on promotional pricing; presented results to the VP of Merchandising monthly.
- Automated weekly reporting with Airflow and SQL, saving the team 10 hours per week.

Graduate Research Assistant, University of Michigan

Sep 2021 – May 2023

- Researched causal inference methods for observational health data; co-authored a paper accepted at JSM 2023.
- Taught R and Python labs for an introductory statistics course of 120 students.

Data Science Intern, Lumen Health

Jun 2022 – Aug 2022

- Developed a readmission-risk model (logistic regression, gradient boosting) with AUC 0.81 on 2M patient records.

PROJECTS

Chicago transit delay predictor

Python, PyTorch, FastAPI, Docker

- Sequence model predicting CTA bus delays; deployed as a public API with 5k monthly requests.

EDUCATION

University of Michigan, Ann Arbor, MI — M.S, Statistics (GPA 3.8)

Jan 2021 – Jan 2023

SKILLS

A/B Testing, Airflow, Budgeting, Causal Inference, Data Visualization, Docker, Excel, FastAPI, Git, Pandas, Pricing Strategy, PyTorch, Python, R, SQL, Snowflake, Statistics, Tableau, XGBoost, dbt, scikit-learn
