Software Engineer

SUMMARY

Backend-leaning full-stack engineer with 4 years of experience building payment and marketplace systems in Python and TypeScript. Comfortable owning services end to end, from schema design to on-call.

EXPERIENCE

Software Engineer II, Sable Payments

Jun 2022 – Present

San Francisco, CA

- Designed and shipped a ledger reconciliation service in Python and PostgreSQL that processes 2.1M transactions per day with 99.98% accuracy.
- Cut p95 latency of the payouts API from 840ms to 210ms by adding Redis caching and rewriting three N+1 queries.
- Led migration of 14 cron jobs to Airflow on AWS (ECS), reducing failed runs by 60%.
- Built React and TypeScript dashboards used by 40 operations analysts to investigate disputed transactions.
- Mentored two new-grad engineers and ran the team's weekly design review.

Software Engineer, Fernweh

Jul 2020 – May 2022

New York, NY

- Built booking and inventory APIs in Django REST Framework serving 300k monthly travelers.
- Implemented Stripe payments integration including refunds, chargebacks, and 3DS flows.
- Introduced GitHub Actions CI with pytest and Playwright, taking deploy frequency from weekly to daily.
- Wrote SQL reports in PostgreSQL and dbt for the finance team.

Software Engineering Intern, Northwind Labs

Jun 2019 – Aug 2019

- Prototyped a log search feature in Go and Elasticsearch, demoed to customers at the summer offsite.

PROJECTS

Splitwise-style expense tracker

Next.js, Prisma, PostgreSQL

- Open-source app with 1.2k GitHub stars; supports multi-currency groups and OCR receipt import.

Latency budget CLI

Go

- Command-line tool that fails CI when p95 latency regresses past a budget; used by two teams at Sable.
